

SUNSCOPE™

Natural Light Systems

www.SunScope.com

8.5" 13" 17" 21"
AVAILABLE IN 4 SIZES!

Residential & Commercial Tubular SkyLights

The SunScope™ is a super reflective natural light system that allows daylight to illuminate your home or business. Daylight is reflected down the cylinder to a translucent ceiling fixture, which uniformly diffuses natural light through out your building - even on a cloudy day!

The **SUNSCOPE** is:

*** Easy to Install**

The SunScope is perfect for home or office renovations, requiring no structural changes, drywall repairs or repainting, and is easily installed in less than three hours.

*** Energy Efficient**

The SunScope virtually eliminates daytime electric lighting requirements. The SunScope has no winter heat loss nor summer heat gain.

*** A Natural Light System**

The SunScope illuminates your home or business - even on cloudy days - with natural light beneficial to everyone's health.

*** Maintenance Free**

The SunScope has no moving parts and is virtually maintenance free.
